Demo #10 - Handin Template (More Firestore Interactions)

☐ **Please "Make a copy" of this google doc file for yourself.**
☐ **Please name the file:** *lastname_firstname_demo10.pdf*

Part 1: Profile page

Screen Capture #1:

Your profile.html page with the form. Annotate:
- URL of the page
- The name of the new user who just signed up (The name of the user should be your name)
- The city of the user
- The school of the user

Screen Capture #2:

Your Firestore console. Annotate:
- "users" collection with the newly created user who just signed up (same name shown in screen capture #1- your name!)
- The city which the user updated using the form.
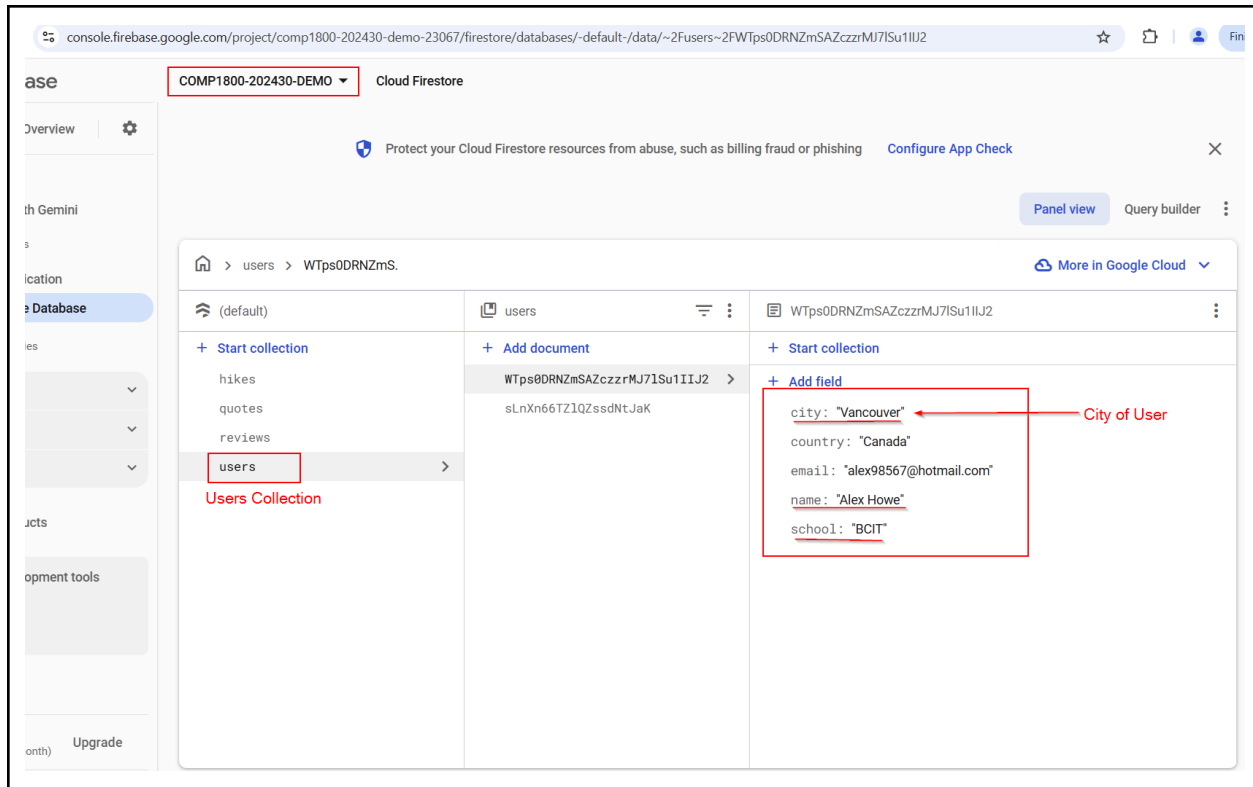

Part 2: Write a Review

Screen Capture #3:
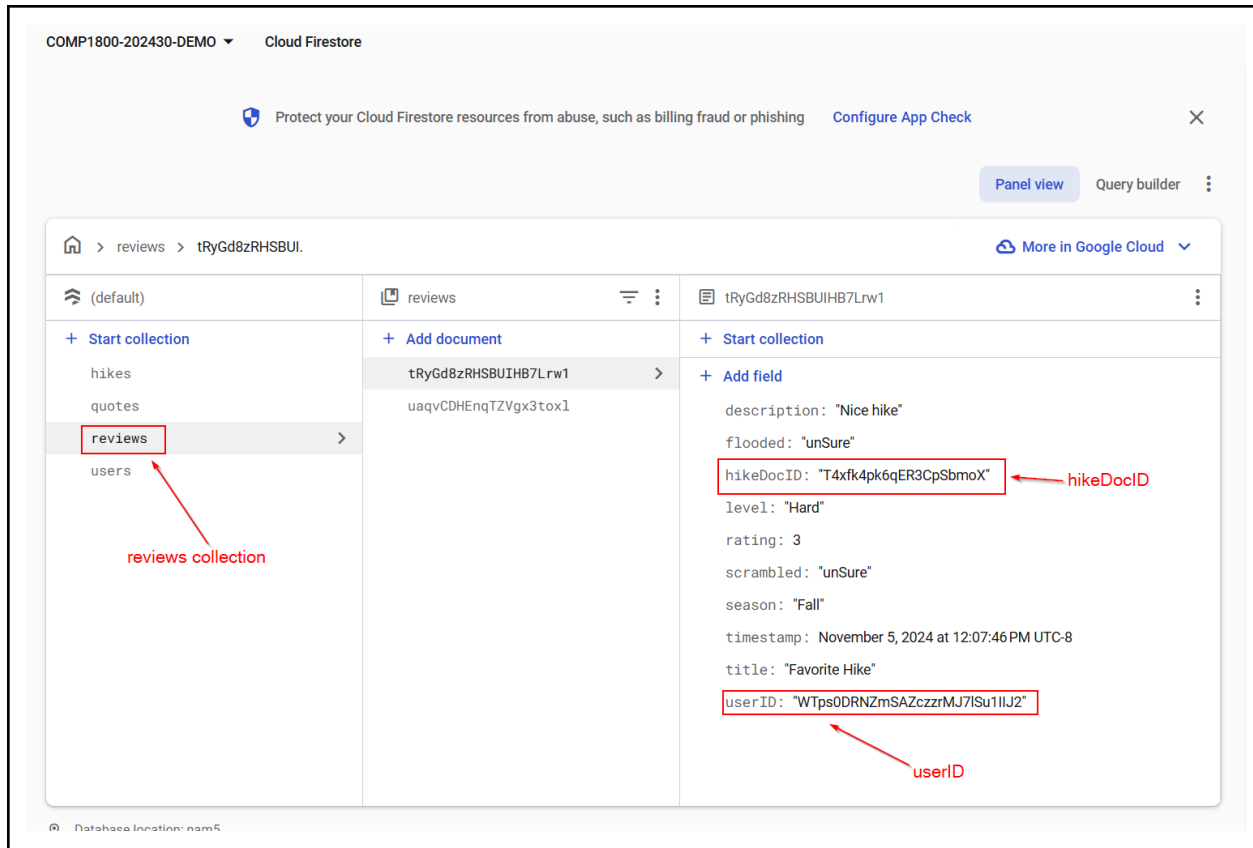

Render your review.html. Annotate:
- URL of the page
- Local storage with the hikeID of the card clicked
- The name of the Hike on top of the page

Screen Capture #4:

Firestore showing the "Reviews" collection added. Annotate:
- Reviews collection
- UserID fields in the document.

Screen Capture #5:

Take a screenshot of your eachHike.html with some reviews. Annotate:

- URL of the page showing the hike document ID
- The name of the same hike shows up on the page.
- Some reviews of this hike shown on the HTML page
